Art Unit: 1732

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-12 and 21, drawn to a method for molding composite items, classified in class 264, subclass 45.4.

- II. Claims 13-18, drawn to apparatus for molding composite items, classified in class425, subclass 4R.
- III. Claims 19-20, drawn to a helmet for cycling or skiing, classified in class 2, subclass 425.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as one in which beads which are not expanded or capable of being expanded are shaped.

Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product structure as claimed, or as imputed from the steps conducted, can be made by another

Art Unit: 1732

and materially different process such as one in which a movable half mold is coupled with another half mold which has no capability of translatable movement.

Inventions II and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product structure as claimed, or as imputed from the apparatus structure employed, can be made by another and materially different apparatus such as one in which a movable half mold is able to be coupled with another half mold which has no capability of translatable movement.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring divergent fields of search for the respective inventions, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Kuhns whose telephone number is (703) 308-3462. The examiner can normally be reached on Monday to Thursday from 7:00 to 5:30.

Serial Number: 09/886,117 Page 4

Art Unit: 1732

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Crispino, can be reached on (703) 308-3853. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-7718.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
